

PROJECT SHEET

L10-C, -D & -G DECOMMISSIONING

ENGINEERING, PREPARATION, REMOVAL & TRANSPORTATION

BOSKALIS

Royal Boskalis Westminster is a leading global marine contractor and services provider. With safety as our core value, we offer a wide variety of specialist activities to the oil & gas and renewables sectors. These activities include marine installation and decommissioning, seabed intervention, marine transport and services, subsea services and marine survey. In addition, Boskalis is a global dredging contractor, provides towage and terminal services across the globe and delivers marine salvage solutions.

INTRODUCTION

Neptune Energy Netherlands B.V. (Neptune) has awarded Boskalis the contract for the removal, transport and load-in of three platforms. These platforms are located in the Dutch North Sea, approximately 90 km west of Terschelling. The platforms are situated in the L10 field and are named L10-C, L10-D and L10-G. Water depth at the various locations is approximately 26 m.

The topsides weighed around 500 tons and the jackets approximately 600 tons.

Contractor scope of work is the removal, transport to the dismantling site at Flushing and subsequently offloading to the quayside of three offshore platforms.

SAFETY

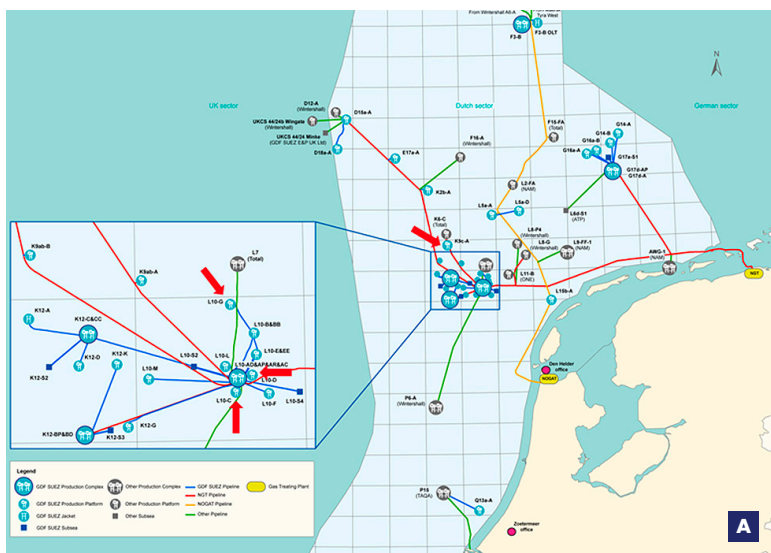

Safety is our first priority during the execution of a project. The Boskalis NINA (No Injuries No Accidents) program was implemented in all facets of the project and adopted by the client and all subcontractors. All personnel involved in the operations were trained in the NINA program, resulting in a high level of safety awareness and commitment. The project was completed with zero lost time incidents.

PROJECT CHALLENGES

During the project execution the world faced the COVID-19 pandemic. With combat plans in hand the project was safely executed safeguarding the health of the complete crew.
